

Year 1
Mrs Lucarelli's
Weekly Newsletter.
25th November 2016

This Week... has flown by! What a busy week. We started the week looking at how to make half in shapes. We also learnt about how to write half in the

'Maths Code' - $\frac{1}{2}$

Tuesday brought an Alien Invasion and we used our measuring skills to make an Alien Mixture. The children were introduced to 'grams' and 'millilitres'.

On Wednesday we had a fantastic time on our "Number Bonds to 10" bowling trip. Some fairly high scores were reached and hopefully their number bonds have improved too!

Thursday we opened up a shop as we were learning about different coins and their values. We talked about their different colours and shapes and how different combinations of coins make different values.

Certificates and Awards

Maths Prize Winners:

Jack
Lucy

Christian Value Certificate for
Hope
Lucas

We finished off the week with a Toy Shop logic problem which used positional language (next to, above, below etc.)

All week long we have been improving our reading skills alongside all the Maths activities we have been doing.

Because of our week being so busy we haven't had the chance to change the clouds each day but our 'outstanding' section will be back to normal next week.

Homework this week is continuing our 'Maths' theme. Please could you bake or make something with your child that involves measuring in grams, millilitres or both. If baking is a little tricky perhaps they could make an 'alien recipe' by measuring and mixing random items from around the house.

Thank You...

...to everyone who came on Parents' Evening. It was a real encouragement to meet such a supportive group of parents and really great to finally be able to match children with mums and dads!

Talk Topic

When shopping this week perhaps your child could pay for something small using the correct coins.
