Weds 11<sup>th</sup> – Fri 13<sup>th</sup> Feb – Yr5/6 Borwick Hall Residential

## Have you visited the school website?

You will find a wealth of information there, including class targets and much more detail surrounding the curriculum for your child.

## Class News

With two weeks of 2026 under our belts, I can testify that Class 5 are back into the rhythm of learning, and 2025 seems like an age ago!

The wintry weather has timed itself perfectly as we have begun to learn about Ernest Shackleton and his ill-fated expedition of 1914. Conditions were much harsher in Antarctica than any we have to contend with and we have had a lot of fun conjuring up our own similes, metaphors and personification to describe them. At the same time, we have also embarked on a journey of discovery on the theme of 'Extreme Weather' in Geography. We have had some great discussions around what this is (and what it is not) and have become very knowledgeable about hurricanes. We are looking forward to finding out about more types of extreme weather and making a display for the Year 6 corridor.

This term, our Science topic is focused on the classification of plants and animals. We have discovered that Carl Linnaeus created the classification system that is still in use today and are going to investigate microorganisms by finding out which food is best for growing yeast.

Given current events around the globe it seems appropriate that our RE lessons are on the theme of the Exodus – an event that has significant links to freedom that still resonate today.

**Borwick will soon be upon us. There is an information evening with further details about this trip in school on Wednesday 28<sup>th</sup> January at 6pm. Hope to see you then.**
