

Artificial Intelligence

Use of AI at Lea Endowed Church of England Primary

At Lea Endowed Church of England Primary School, our vision “*Let Everyone Shine*” guides every decision we make. Rooted in Jesus’ teaching, “*Let your light shine*” (*Matthew 5:16*), we are committed to nurturing each child’s God-given potential with wisdom, compassion, and integrity.

Our Christian Ethos

In all our use of technology, we seek to follow God’s example by acting with love, respect, and integrity. AI will never replace the relationships, care, and human connection that sit at the heart of our school community. Instead, it will be used thoughtfully to help every child flourish and shine in their own special way.

As new technologies such as Artificial Intelligence (AI) become part of everyday life, we believe it is important to approach them with care, discernment, and a strong moral foundation. Our use of AI will always reflect our Christian values and our responsibility to safeguard and support every member of our school family.

How We Use AI

We will use AI in ways that:

- **Enhance learning**, helping children access high-quality resources and personalised support where appropriate.
- **Support teachers**, reducing administrative workload so they can focus more fully on teaching, relationships, and pastoral care.

Our Ethical Commitments

We will always ensure that AI is used:

- **Safely** - protecting children’s privacy, data, and wellbeing.
- **Responsibly** - with human judgement, compassion, and professional expertise at the centre of every decision.
- **Fairly** - ensuring that technology supports inclusion and does not disadvantage any child.
- **Transparently** - communicating openly with parents about how AI is used in school.
