

IF YOU WERE an **ENGINEER** WHAT WOULD YOU DO?'

Home Learning Project for ages 3-19!

There is nothing like a little boredom to fuel creative invention! With that in mind, we thought some of our children might really enjoy this challenge as a supplement to other home learning we are providing!

The organisers are providing online interviews with engineers, who will share their work experiences and answer questions; along with some activities to help get you 'thinking like an engineer'.

So, how do you get involved?

Firstly, you will need to register, this can be done by clicking the link below:

<https://leadersaward.com/resource-area-registration/>

Once registered, you will be given access to online resources, guides and information on the upcoming engineer interviews via the resources area.

This project will give everyone the opportunity to delve into the fun world of engineering and put their creativity to the test! It has been created for parents/carers/guardians to deliver at home to children their household so hopefully it will be user friendly!

The deadline for this project is 10th September 2020 so the children could be really encouraged to take their time and carefully plan it out! They will need to think about how their project can stand up against a great deal of stiff competition!

If you do have any queries at all or require more information, please visit the [website](#), [sign up to our newsletter](#), or contact the organisers directly at info@leadersaward.com.
